FIRE SLIDING GATES

FIRE SLIDING GATES GSF BP EI

GSF BP EI Fire Sliding Gates are an effective solution for securing openings in internal and external vertical partitions to prevent the spread of fire, thermal radiation and provide thermal insulation. They are used in both public and industrial buildings and in storage areas. Thanks to the use of advanced fire protection technologies, these doors provide a reliable protective barrier that meets the highest safety standards. Fire Sliding Gates have hygienic certificate. All our fire rated sliding gates are CE marked and tested according to European standards EN 16034:2014 and EN 13241:2003+A2:2016.
